

EDUCATION

University of Virginia, Charlottesville, VA	
Master of Science in Data Science	August 2025 – August 2026
- GPA: 3.70/4.00 - Relevant Coursework: : Big Data Systems, Decoding Large Language Models, Data Mining and Statistical Learning, Deep Learning, Text as Data, Computation for Data Science, Introduction Predictive Modeling, Data Pipeline Architecture	
Virginia Tech, Blacksburg, VA	
Bachelor of Science	August 2020 - December 2024
- GPA: 3.30/4.00 - Statistics - Minor: Finance	

CERTIFICATE

Google Data Analytics	May 2025
IBM Data Science Professional Certificate	April 2026

PROFESSIONAL EXPERIENCE

UVA Institutional Research and Analytics (IRA), Charlottesville, VA	
Database Normalization Analyst	March 2026 – Present
- Reduced address data inconsistencies by 30% by engineering a normalization pipeline standardized 500K+ rows of student data in the university’s enterprise reporting environment (UBI). - Enabled accurate cross-border analytics by designing a scalable international address validation system integrating Census & USPS reference data with fuzzy matching and transliteration. - Cut manual data cleaning by 40% while delivering production-grade Python code and success metrics for ongoing reference table refreshes. - Influenced strategic roadmap by researching real-time address validation APIs, projected to further reduce geographic reporting errors by 15%.	
Amway, China	
Data Analysis Intern	February 2025 - April 2025
- Drove 15% ROI lift and 10% customer retention by leading regression and time-series analysis on sales & campaign data across 500+ marketing events. - Automated Excel + R workflows to clean and standardize daily operational data, reducing manual processing effort by 30%. - Delivered executive-ready dashboards directly informed a 10% increase in marketing ROI. - Boosted brand awareness (10K+ views) by producing product promo videos with Premiere Pro & CapCut, directly linked to increased sales.	
ZJU-Hangzhou Global Scientific and Technological Innovation Center, China	
Data Pricing Analysis Research Intern	June 2024 - August 2024
- Improved market efficiency by 15% by building a dynamic data pricing framework integrated real-time demand signals and data quality metrics. - Increased model accuracy by 20% after feature extraction from 50K+ data market points identified top 10 value-driving attributes. - Reduced pricing errors by 12% using decision trees & random forest in R. - Improved user trust scores by 18% through an adaptive price adjustment module with transparent logic. - Raised dataset reliability from 85% to 96% via rigorous data quality assessments.	
Data Bridge Research at Virginia Tech, Blacksburg, VA	
Lab Research Assistant	January 2023 - September 2023
- Increased crop yield by 8% while reducing fertilizer use by 10% after analyzing 200+ farm samples, presented recommendations to university researchers and local farms. - Drove 15% higher engagement for library consultation services by promoting data science support to 100+ VT clients. - Created interactive visualizations using SQL, R, Python simplified complex agricultural data for non-technical stakeholders.	

TECHNICAL SKILLS

- Data Science & Analytics: Statistical Modeling (Regression, Time-Series), Predictive Modeling, Business Analysis, Data Quality Assessment, A/B Testing - Big Data & Cloud: Apache Spark, MapReduce, Hadoop, Ray (Distributed AI), AWS EC2/Lambda, GCP, DuckDB, Serverless Computing - Languages & Tools: SQL, Python (Pandas, NumPy), R (tidyverse, caret), Java, Power BI, Tableau, Linux Shell, Git - AI & Dev: LLM checkpointing, AI-assisted coding (Claude Code), sustainable AI infrastructure
